

Employers Membership Association

Strategic HR Partners is proud of our partnership with CareATC, Inc. to offer Population Health Management solutions via On-Site and Shared Employee Health Centers.

Strategic HR Partners is a regional, non-profit organization that provides a complete range of Human Resources products and services for our member companies. We offer both complimentary and discounted HR products and services to member companies. In addition, other substantially discounted services are available as a benefit of membership from prestigious, nationally known companies who are part of our strategic alliance. We can create or supplement all of your human resources needs from hourly handbooks to executive coaching. Our products and services are critical to companies of all sizes and industries. Our members include CEOs, company owners and human resources professionals.

CareATC Inc. is a national leader in Direct Primary Care and Population Health. Since 2000, they've partnered with employers of every size to help solve three of healthcare's most vexing problems: Lack of access, lack of value, and pricing failure.

Through a network of on-site and shared-site primary care centers, CareATC has made accessing healthcare easier and more affordable than ever before. By contracting direct with employers, they're able to deliver a level of quality, transparency, and control currently unavailable in mainstream healthcare. The natural outcome is a shift from reactive medicine to prevention, resulting in a healthier and happier American workforce.

For more information, contact Charles Little or Judy Giddings with Strategic HR Partners.

Why CareATC, Inc?

Our innovative health and wellness ecosystem is more than a model, it's a movement. Led by our flagship primary care centers, our solutions promote awareness, access, and health optimization for every participant, while giving employers the necessary visibility and resources to effectively manage the health of their workforce.
